HARD SKILLS

- HTML
- CSS
- JavaScript
- React
- Styled components
- MUI
- GSAP
- Git

SOFT SKILLS

- Teamwork
- Time management
- Critical thinking
- Communication
- Creativity
- Learnability
- Attention to details

PROFILE

I have practical experience of implementing projects on React according to the principles of responsive web design. My main hard skills (React, JavaScript, CSS, HTML) are confirmed on my LinkedIn profile according to the results of relevant tests. I also have developed corporate website of the Lithuanian company UAB «FerroMetals».

EXPERIENCE

React Developer in UAB «FerroMetals»   [02.2023 - up to now]

I was responsible for developing of the company`s corporate website (in the activity "Woodworking machines production and sale"). The development of UAB "Ferrometals" company`s website included the formation of the website structure (header, footer, navigation panel and web pages), the implementation of the mechanism of instant changing language without reloading the site, the implementation of the callback request function and the contact form. A feature of the project is the work with complicated graphic design, presented in the desktop version of the site, which included in-depth work with svg (the adaptive version of the site retains the initial aspect ratios of geometric shapes and degree measures of angles even with dynamic changes in screen size). Currently, all the functionality of the project is fully implemented (delaying publication of the website is caused by the delay in providing text and graphic materials by the designer).

The current version of the website can be found by link:

https://ferrometals.netlify.app/

VOLUNTEERING

HTML/CSS mentor in CodeClub

As a volunteer mentor in the charitable organization "The Charitable Foundation "Покоління.ЮЕЙ"" I was responsible for teaching HTML/CSS course for students in the age group of 12-15 years including the preparation and presentation of lectures along with formulation and checking of homeworks.

LANGUAGES

- Ukrainian – native
- English – B2

COURSES

- React Online Marathon in Softserve IT Academy - [10.2022-12.2022]
- HTML5/CSS3/JavaScript Fundamentals course in Softserve IT Academy - [09.2022 -10.2022]
